Vacancies in Chemistry Teaching
Several leading independent schools in the South East of England require a Chemistry teacher, either immediately or from April or September 2017. These are all permanent positions which would entail teaching Chemistry to A level. There is assistance with accommodation with many of the positions.

Essential: An excellent academic background, including a degree in Chemistry or related discipline.

Desired: A postgraduate degree or in the midst of completing one, as well as a background of tutoring, or any experience working with children would be a bonus, however this is certainly not essential.

The successful candidate will be able to convey his/her own enthusiasm, commitment to students of all ages, to encourage self-motivation, a genuine love of learning and enquiry to the students in the department. The schools place an equal focus on academic excellence and a robust pastoral care system. Being able to offer inspirational teaching would be essential. Support to gain Qualified Teacher Status (QTS) would be offered.

If you are a Chemistry enthusiast looking for a vibrant school, please forward your CV asap to devra.farhi@harrishill.co.uk or please ask for Devra on: 020 7587 5153 or Mob: 07795 221266 for further details.

Chemistry Equality & Diversity Student Survey
This survey is for all Undergraduate, Postgraduate and PhD students who are based in the School of Chemistry.

Please fill in this questionnaire to help us improve your experience of studying in the School. The questionnaire surveys your experiences and perceptions within the School, particularly those that may be affected by gender equality issues. The analysed and summarised results will be used to improve School practices and for preparing our submission to something called an Athena SWAN gender equality award - an important part of modern organisations’ public credentials.

The survey is anonymous and no attempt will be made to identify any individual.

The survey should take approximately 10 minutes to complete and is open until Friday, 10th February 2017.

The survey can be accessed at: https://standrews.onlinesurveys.ac.uk/chemistry-diversity-students
The password required is: chemistry2017

New Faces
Maria Oranges comes from Italy and completed Batchelors and Masters degrees in chemistry at the University of Calabria. She has now started PhD work with BEB and is interested in reading, watching films, swimming and walking.
Luca Spiridiglizzi comes from Italy and has a degree in mechanical engineering from UNICLAM (Università degli Studi di Cassino e del Lazio Meridionale). He is spending a 3-month research period with JTSI and is interested in playing the piano and modelling.
